Taylor,

I have attached a few files to help you make your pitch for your project. The more we looked at what we originally suggested the more we realized that the intimal grant application was going to be too big of a project for what you were looking for and we then turned our attention to having you try and make the grant reimbursement application your project. It is a much smaller process and still, we believe will suit your needs. This can be a very time consuming and confusing process for our customer and we are hoping that you can help us overcome that. With the attachment you will find a word version of our current grant reimbursement application. We are hoping with your project, we can get an end product for the user that is more efficient, less confusing, and easier and also make sure they are submitting the appropriate information so we can be more efficient on the turn around. If you have any questions please feel free to contact me. Thank you and have a good day and good luck.
